

Color a Canary

Canaries are amazing creatures. They like to be around people but do not mind being alone in their cage. With proper care, canaries can live for up to 14 years. Not all canaries are yellow like cartoons make us think, but Edith's grandmother's canaries were all bright yellow!

Edith did not really like having birds, but she learned a lot of responsibility by caring for them.

Now it is your turn. Color the bird below. What will you name your new friend?
